

# R290 Compact Heat Pump

Green Refrigerant

The R290 Compact Heat Pump is an electrically driven heat pump based on scroll technology featuring a climate friendly refrigerant and high performance.

The thermodynamic properties of R290 are astonishing. Heating applications to very low temperatures is possible, as well as the powerful cooling performance at high temperatures.

## Technical Specifications

- Nominal voltage: 360Vdc
- Heating & Cooling: over 6kW performance
- Size: scroll 26cc

## Advantages

- Environmentally friendly
- Excellent NVH - quiet scroll and active torque control
- Low-cost refrigerant
- High efficiency
- Very safe - low filling amount (150g) & zero leakage
